ICD-10-PCS, Part 2: The Med/Surg-Related and Ancillary Sections

(Course II of III)

Libman Education is proud to bring you ICD-10-PCS, Part 2: The Med/Surg-Related and Ancillary Sections, an online, self-paced course by well-known author and ICD-10 expert Lynn Kuehn, MS, RHIA, CCS-P, FAHIMA.

Course Description
This course is for existing inpatient coders who have taken ICD-10-PCS, Part 1: The Med/Surg Section or another introductory ICD-10-PCS course. You will learn how to code procedures in the Medical and Surgical-related and Ancillary Sections of the ICD-10 Procedure Coding System.

Online Flexibility! Work at your own pace; save time and travel costs.

Course Objectives:
> Apply foundational knowledge including: definitions of root operations, index and table concepts, and selecting the correct characters based on the documentation
> Get introduced to the remainder of the ICD-10-PCS system
> Master new root operations, root procedures, and root types within the last 15 sections of PCS

ICD-10-PCS, Part 2: The Med/Surg-Related and Ancillary Sections is the second of three courses in Libman Education’s ICD-10-PCS series. The other two courses are:

Course I: ICD-10-PCS, Part 1: The Med/Surg Section: The first course in the ICD-10-PCS series is foundational and prepares students for the remaining two courses. The course provides an introduction to the structure and design of ICD-10-PCS and the content of the coding guidelines.

Course III: ICD-10-PCS, Part 3: Advanced Coding by Body System: The third and final course in ICD-10-PCS coding provides a deep dive into coding by body system at an advanced level. Students completing this final course develop the mastery level skills to code confidently.

$220.00 per person/per course (Call for group pricing.)
6 AHIMA CEUs for completing the course
